Assignment - Basic GUI and Exception Handling  
- with example video

write down your estimate on how long you anticipate the development of the project to take  
comment: name, date, program description  
log time spent working on the program  
below the estimate

When complete the project compute the number of hours it took to complete it  
note this write a paragraph analysis on why it took longer/shorter and how to improve for the next project

Create a GUI with at least 3 different types of GUI components that are operational  
add 2 types of exception handling in your code. Research and write a paper 1-2 pages long with citations on when you should/ have to use each of the different methods
